### Apex Classes

Apex Code is an object-oriented programming language that allows developers to develop on-demand business applications on the Lightning Platform.

**Percent of Apex Used: 0%**  
You are currently using 0 characters of Apex Code (including comments and class-level annotations) in your organization, out of an allowed limit of 6,900,000 characters. Note that the amount of code includes both Apex Classes and Triggers defined in your organization.

Calculate your organization's code coverage

Generate all reports

View: [Select] Edit | Search Data Table

Apex Class	Package Name	Apex Version	Status	Generate from WSDL	Run All Tests	Schedule	Last Modified By	Run Trace Flags
No records to display								

### Dynamic Apex Classes

Dynamic Apex extends your programming reach by interacting with Lightning Platform components.
